# Antoine d'Otreppe de Bouvette

## About me

I'm willing to make a difference, to make things that are actually useful. Saving time, empowering people, saving precious earth resources are the key goals.

I love working with a number of different technologies, although I'm focusing on iOS and mobile development in general. Open source is my thing, and I wrote free software for years before I started working as a professional.

I'm most comfortable with Agile and Scrum methodologies, and absolutely love working with git and github. I'm focused on what I do, yet I can step back with ease to look at the bigger picture. I always try to bring quality and value to the product I'm building.

I would happily take my bicycle to work and work from home.

## Work experience

Aug '13 — Now	iOS (ObjectiveC + HTML5) developer PlayStation 3 (Javascript) developer at <b>Sony</b>
July '11 — July '13	iOS developer Functional Analyst & Information Architect at <b>Emakina Group</b>
